

Abstract

A method of obtaining a rebate. The method includes the steps of selling a product or service to a buyer for a price at a first point in time, providing the buyer with an expectancy of a rebate, wherein the expectancy equals a first amount at the first point in time, investing at least a portion of the first amount in a financial investment vehicle, and providing the rebate to the buyer after a predetermined amount of time. After the predetermined amount of time, the rebate equals a second amount. The second amount is equal to what the first amount has matured to in the financial investment vehicle during the predetermined amount of time. The second amount is approximately equal to the original price.
